PROFESSIONAL SUMMARY

Candidate for **ICT Officer II — Artificial Intelligence Applications**. Self-directed practitioner who prepared through a structured **13-project portfolio** with **158 automated tests**: Python, Django, FastAPI, machine learning and a complete **document Q&A assistant (RAG)** that answers questions from PDFs with citations, using a **local LLM (Ollama)** with an **interchangeable cloud LLM backend (OpenAI-compatible API via environment config)**. Documents every project in Swahili + English READMEs and works with Git/GitHub version control. [ongeza sentensi 1-2 kuhusu elimu yako au lengo lako]

CORE SKILLS — MAPPED TO PSRS REQUIREMENTS

Skill Area	Technology	Evidence in portfolio
Language	Python (primary), JavaScript, HTML/CSS, SQL	All 13 projects; test suites in pytest
Pipelines / APIs	RESTful APIs, JSON, Pydantic schemas, upload → process → respond	FastAPI service (P13): 6 endpoints, validation 400/404/422
LLM hosting	Ollama (local, llama3.2:1b) ⇔ cloud LLM API (OpenAI-compatible) — switchable by config, no code change	P13 answers generated on-device; graceful offline mode; MJIBU_BACKEND env toggle
Prompting	System prompts, structured JSON outputs, citation rules, anti-hallucination (“Sijui” policy)	mjibu/prompts.py + tests
Agentic AI / RAG	Retrieval-Augmented Generation, Chroma vector database (persistent, cosine), text embeddings (hashing + Ollama neural), chunking w/ overlap	P13 core pipeline (retrieve → context → generate)
Version control	Git, GitHub (branch main, .gitignore, push workflow)	Public repo, commit history per sprint
Data / ML	pandas, scikit-learn (TF-IDF, classification, precision/recall), model persistence	P9 classifier: 94.7% accuracy, 12 tests
Web systems	Django (ORM, migrations, RBAC, audit trail, atomic transactions), vanilla JS	P10–P12: 3 full systems, 63 tests
Delivered	Embeddings + Chroma vector DB (done), cloud LLM backend (done), HF sentence-transformers (next)	P13 upgrade, Oct 2026 — 30/30 tests green
Next	LangChain / LlamaIndex orchestration, streaming, neural embeddings	Listed in P13 README roadmap

SELECTED PROJECTS

- Mjibu — Document Q&A assistant (RAG)** · Python, FastAPI, Chroma, Ollama/OpenAI, scikit-learn, JS — matches the “Portfolio Project Idea” of this exact vacancy
- Ingests **PDF / MD / TXT** → automatic **chunking** (600 chars, 100 overlap) → **embeddings** stored in **Chroma vector DB** (persistent, cosine) → top-k context → **local LLM (Ollama)** or **cloud LLM API** → Swahili/English answer with **citations [1]**.
 - Chat UI, upload/delete endpoints, “Sijui” fallback (no answer outside context), structured JSON responses, friendly offline mode, backend switch by environment variable (MJIBU_BACKEND=ollama|openai).

- **30 automated tests** (chunking, embeddings, Chroma store, vector-store factory, API validation, prompts, both LLM backends mocked).

Optimizer — ML lead-scoring classifier · pandas, scikit-learn, pytest

- Feature engineering, train/test split, **94.7% accuracy**, pickled model, 12 tests.

Three full Django systems — Benki 360 (banking), Ofisi 360 (office workflow), Duka (e-commerce)

- ORM + migrations, **3-level RBAC**, Kiswahili admin, audit trail via signals, CSV reports, **atomic checkout**, price snapshots, cart context processor — **63 tests total**.

Cybersecurity toolkit · hashing, port scanning, keylogger detection (sandboxed)

- Integrity checks + scanning with documented ethics boundaries — 18 tests.

Portfolio website · responsive HTML/CSS/JS documenting all projects

- Dashboard of 13 projects, run instructions and learning roadmap.

EDUCATION

[CHUO / TAHLILA / MTAALA] — [Taluma / Kozi, miaka ya masomo]

[Matokeo muhimu — SOMA: vyeti tu vilivyothibitishwa vitambulishwa; result slips HAZIKUBALIWI kwenye maombi ya PSRS]

CERTIFICATIONS

- [Cheti/mbadala uliyopata — ISC² CC / Kaggle / freeCodeCamp / n.k.]
- In progress: free global courses (Cisco Networking Academy badges, Kaggle micro-courses, freeCodeCamp Data Analysis, Hugging Face NLP).
